Festival della Scienza

Genoa, 25th october _ 6th november 2007 | www.festivalcienza.it

Photo: Robin Hood is curious about the Festival's trademark. The experts of ISTC-CNR of Rome have been studying for years the behaviour of tufted Capuchin Monkeys, which are very innovative and manipulative animals. In this case the monkeys have not been exploited for publicity purposes, but rather to give them something interesting to explore.

Design Gaetano Cassini and Annalisa Gatto - Photo Guido Castagnoli

Comune di Genova

From the 25th October to the 6th November 2007 the Science Festival returns to transform Genoa into the international headquarters of scientific dissemination. For thirteen days the city and the entire region are the inspiring backdrop for a new exploration of the world of research in search of *Curiosity*, the theme and keyword of this edition. The protagonists of a calendar with more than 350 appointments, which transcend all known boundaries between knowledge and forms of expression, are many of the most important voices of the international scientific community. The stage for the presentation of the 2007 programme is CERN in Geneva, the world's largest particle physics laboratory, where the World Wide Web was born; providing a unique opportunity to discuss the frontiers of science communication in the place where the greatest revolution in the transmission of knowledge and information in the modern age took place.

On the occasion of the presentation
of the fifth edition of the

Genoa Science Festival

CERN, The European Organization for Nuclear Research
and the Science Festival Association
have the pleasure of inviting you to the debate
Science, Web and Democracy

with Robert Cailliau
Computer scientist
Co-creator of the World Wide Web

and James Gillies
Head of communications at CERN

Coordinated by Paola Catapano
Science Communicator at CERN

The Festival is presented by:

Manuela Arata
President of the Science Festival

Vittorio Bo
Director of the Science Festival

Thursday, September 27th 2007, 11.00
CERN - Globe of Science and Innovation
Route de Meyrin, Geneva (CH)
